

# Parameswaran Raman

## CONTACT INFORMATION

115 Leonard Street, Apt A  
Santa Cruz, CA 95060

☎: (408) 306-4462,      e-mail: [params@ucsc.edu](mailto:params@ucsc.edu)  
 homepage:    <http://people.ucsc.edu/~praman1>

## RESEARCH INTERESTS

Optimization for Machine Learning, Large Scale Bayesian Inference, Learning to Rank

## EDUCATION

**PhD - Computer Science**, UC Santa Cruz **Aug 2014 - present**  
 Thesis Advisor: S.V.N Vishwanathan  
 (Transferred from **Purdue University (2013 - 2014)**)

Masters - Computer Science, Georgia Institute of Technology Aug 2009 - May 2011

**MSc (Integrated) - Software Engineering, PSG College of Technology, India** **2003 - 2008**

## RESEARCH EXPERIENCE

*Graduate Research Assistant, UC Santa Cruz* Aug 2013 - present

- **[In Progress]** Efficient methods for large-scale bayesian inference in mixture of exponential families.
- **[In Progress]** SGD algorithm for scaling up multinomial logistic regression problems to very large number of classes and examples, by exploiting special structure in the objective function.
- **[Accepted for NIPS 2014]** Proposed a new Learning to Rank algorithm (RoBiRank) inspired by Robust Binary Classification, which directly bounds NDCG. Demonstrated scaling on large datasets.

*Research Intern - Microsoft (Cloud and Information Services Lab)* **Summer 2015**  
(Mentors: Keerthi Selvaraj, Dhruv Mahajan)

Worked on the problem of extrapolating learning curves in machine learning. The goal was to study if it was feasible to use information from the models learnt on various sizes of small bites of data to extrapolate performance of the algorithm on the full data.

*Research Intern - Search Relevance (SNA), LinkedIn* **Summer 2014**  
(Mentors: Viet Ha-Thuc, Shakti Sinha)

Worked on resolving issues of sample bias and position bias present in learning to rank systems with implicit feedback. Explored a variety of approaches, and ran offline and online experiments on LinkedIn Job Search portal to verify the effectiveness of the models.

Graduate Research Assistant, ITAP - Purdue University Aug 2013 - Aug 2014  
**[Accepted for EDM 2014]** Applied machine learning on educational mobile & web apps data to infer  
 relevance of user posts to the lecture topics. Results helped improve student engagement in classrooms.

<i>Independent Research, Info Lab, Stanford University</i>	<b>Summer 2012</b>
<p>Explored the scope of using learning methods in crowd-sourcing systems, to improve label complexity and quality of judgements among workers. In addition, experimentally analyzed the effects of using various interfaces for categorization of items in a taxonomy, simultaneously trying to model their error rates.</p>	

Graduate Research Assistant, Sonification Lab, Georgia Tech Aug 2009 - May 2011  
**[Work appeared in several demos and accepted for ICAD 2010, CSUN 2010]**  
 Prototyped tools to demonstrate key ideas that came up in two projects Auditory Menus and In-Vehicle Assistive Technology (IVAT). Used machine learning for driver mood detection & providing alerts.

*Research Assistant, Dept of Maths & Computer Applications, PSG Tech* **2007 - 2008**  
**[Accepted for DCCA Jordan 2007 and PETRA 2008]** Worked with Dr Nadarajan and Dr Maytham  
 Safar to propose effective cache replacement policies for Location-Dependent Data in mobile environments  
 and implement tools for evaluating them.

INDUSTRY  
EXPERIENCE

*Software Engineer, Yahoo!, Sunnyvale*

**Jul 2011 - Jul 2013**

- Worked for the Personalization group, on an entity detection/resolution system used by all personalization services. Used machine learning and NLP to detect word/phrase boundaries and rank extracted entities. Built a Knowledge Graph from scratch to power Yahoo! search products.
- Worked on the Web of Objects project, to create a semantic knowledge base of entities to enable personalization. Designed features for Entity Matching models and wrote tools to evaluate them.
- Worked on Apache Oozie (a widely used job scheduler for Hadoop), implementing several features and fixing bugs in the system.

*Software Engineering Intern, Intel, Chandler*

**Summer 2010**

Developed a searching & indexing infrastructure to help silicon engineers find relevant product design information. Gathered requirements, developed & tested the system, and deployed in production.

*Application Developer, ThoughtWorks, Bangalore*

**Jun 2008 - Jul 2009**

Designed and implemented web-services for the train ticket retailing system - thetrainline.com. Worked in a fully agile setup following iterative test-driven software development.

ACADEMIC SERVICES

- Reviewer for UAI 2014, AISTATS 2015, COLT 2015, JMLR 2015, AISTATS 2016
- Developed and taught a bootcamp on Unix & Shell commands to undergrad students at UCSC

HONORS/AWARDS

- Graduate Research Assistantship, UC Santa Cruz
- Graduate Research Assistantship, Georgia Tech
- Winner of Facebook Hackathon 2010 at Georgia Tech & selected for finals at FB HQ
- Finalist for the poster presentation at UIST Student Innovation Contest 2010

COMPUTER SKILLS

- C++, Java, Python, Matlab, MPI, Hadoop, Unix, Lisp, R
